Report on the “Entomofauna of Old World”
1- Index of the recorded species of the Pterygot Insects
(Turkey excluded)

Ahmet Ömer Koçak Muhabbet Kemal

This is the first temporary results of the Project “Entomofauna of Old World” by the Cesa.

The following alphabetical index of the valid specific names of the pterygot insects of Old World is an initiative one, recorded in the Info-system of the Cesa so far.

The scientific names are given below with the authors, usually with the date of publications, and their families. The validity of the names are usually confirmed here from the taxonomical and nomenclatural standpoints. The synonyms are omitted here. The present list comprises totally 2977 species of the recorded insects of the Old World within Info-system of the Cesa (*Lepidoptera* excluded). Total number of the species recorded so far is 5968 (together with Turkey) (except *Lepidoptera*). Currently they belong to 1506 genera of 356 family group taxa recorded.

Next and more comprehensive reports concerning this ongoing Project will be published in this serial at irregular intervals.

Fig. 1 – *Zabalius aridus* (Tettigoniidae, Pseudophyllinae). South Africa: Pretoria N., 28 3 2004 photo M.Kemal (Cesa) [see nr.2958 in the list]

Announcement

Preparing and publishing short documentary and informative films in DVD or MPEG formats are among the scientific activities of the Cesa.

For this purpose, the followings were recently published for the first time or printed again.

If you have an interest in the Lepidopterology, you should have a look at them. For obtaining these publications please contact with Prof. Dr. Ahmet Ömer Koçak or Asst. Prof. Dr. Muhabbet Kemal.

Announcement

Number 145 of the *Miscellaneous Papers* of the Cesa was published on 15th December, 2008. A free copy of its pdf file is obtainable from the following address of the Internet Archive:
<http://www.archive.org/details/CentreForEntomologicalStudiesAnkaraMiscellaneousPapers145>

Announcement

The forthcoming electronical publications of the Cesa

Taking the recent progresses on the electronical publications in the Zoology (see ICZN- Zootaxa 1908: 57-67, 17 October, 2008) into consideration, the status of the scientific serials and other publications of the Cesa should be updated.

According to the new publication strategy of the Cesa, the scientific articles will be published in the following, exchangable serials as online access available to the readers. For this purpose, the previous exchange agreements will be revised and new agreements will be established with the entomological institutions, societies, museums of nature, and related departments of the universities in the World.

Currently available publications of the Cesa may be divided into two groups:

Publications may be obtained through Exchange agreements

Priamus
Priamus Supplement
Memoirs
Miscellaneous Papers
Cesa News
Studies on African Lepidoptera

Publications may be obtained through purchase

Iconographia Series A-D (Insectorum & Arachnidorum)
DVD Films
Mpeg Films
Cesa International Books as CDs

For more information please send e-mail to
